Marine debris is litter that ends up in oceans, seas, or other large bodies of water. This manmade debris gets into the water in many ways. People often leave trash on beaches or throw it into the water from boats or offshore facilities, such as oil rigs. Sometimes, litter makes its way into the ocean from land.

Everything, from the wage slips to the food servings to the ferocity with which people defend their ideals and views, seems much more exaggerated in America than it needs to be. Though, there is a geographical explanation for this: after Russia, Canada, and China, the U.S.A. is the largest country in the world in terms of geographic area.

Roswell is infamously known as the crash site of an Unidentified Flying Object. Located in New Mexico, the area is seen by many as a legendary place where tons of alien-related events occurred. This picture, recently declassified by the United States government, is sufficient proof that Roswell could indeed be a site where aliens may have landed.
